Quantum States
$\psi = \sum c_x |x\rangle \in \mathcal{H}$
pseudo Boolean forms
$f(x) = c_x$
$\mathbb{B}^n \to \mathbb{C}$
Linear operators
$\mathcal{L}(\psi)|k\rangle = c_k|k\rangle$
$\mathcal{L}(\psi) \in \mathcal{H} \to \mathcal{H}$
Generalised Ising models
with spin energies a function of $\psi$
$h = \sum h^i Z_i + \sum J^{ij} Z_i Z_j$
